

PPEC services are prescribed by a physician and are available for up to 12 hours a day. Children age twenty years and younger may be eligible for PPEC services which are covered by Medicaid and many private insurance companies.

Support for the family is the cornerstone of the PPEC program. Family training is an integral part of each child's care plan. While giving the child the opportunity to be socially engaged, it gives family members a vital reprieve, allowing them the opportunity to remain employed and economically independent.

We love our kids!

Our staff of specially trained and experienced nurses and nursing assistants provide for all aspects of each child's unique medical needs.

We offer physical, occupational, respiratory and speech therapies. Special education teachers provide daily educational activities appropriate for each child's level of development.

Pedi Pec is the one address where all the needs of the medically fragile child can be met!

PEDI PEC, a PPEC (Prescribed Pediatric Extended Care, pronounced P-PEC) with locations in Dade and Broward counties, is a day treatment program for medically challenged and technologically dependent children run with a love and commitment to the special needs of our unique children.

Call us today to schedule a tour of our facilities or visit us online at www.pedipec.com

Pedi Pec is locally owned and managed by the same group of caring and dedicated healthcare professionals who own and manage Pedi Stat, an exclusively pediatric home medical equipment company, and an established leader in South Florida pediatric healthcare.
